

Canine Adult Wellness Visits

The Adult Canine Wellness is the first of our recommended two examinations per year. Pets age fast than their human counterparts. Therefore, the more often the veterinarians see them, the better their chances of catching issues before they become a major problem. At Animal Hospital of Statesville, we rotate our canine vaccines after the first adult annual. Therefore, vaccines administered will vary, depending on your pet's vaccination history. We have included prices for vaccines that are not considered core, but, depending on a pet's environment, may be recommended vaccines for your pet.

An Adult Canine Wellness visit includes:

- Annual thorough examination \$48.25
- DHPP vaccination (Distemper, Hepatitis, Parainfluenza, Parvo) \$16.10
- Rabies vaccination (1 or 3-year if due) \$19.00
- Intestinal parasite screening \$26.00
- Heartworm, Lyme, Ehrlichia and Anaplasma Screening \$45.00
- Hazardous waste disposal \$ 4.80
- Heartworm, flea & tick prevention – dispensed by weight of pet**

If your pet is rotating vaccines, here are the separate vaccines and their fees

- Parvo \$18.00
- Distemper, Adeno, Parainfluenza (DAP) \$18.00

Non-core vaccines:

- Leptospirosis vaccine \$19.00
- Lyme vaccine \$31.50
- Bivalent Canine Influenza Virus vaccine (CIV) \$42.00

**Heartworm, flea and tick prevention is priced according to weight of pet and is, therefore, not included in the price list for the Adult Canine Wellness Visit. Animal Hospital of Statesville recommends that ALL pets be on prevention for all external and internal parasites year-round for the health and safety of your pet and your family.
