

Animal Hospital of Statesville  
181 Mocksville Hwy, Statesville, NC 28625  
(704)-802-1280

At the Animal Hospital of Statesville, we strive to help you, the breeder, protect the health of your breeding animals and produce the healthiest puppies possible. As such, we require the following to provide reproductive services:

- 1) A routine annual examination with your primary veterinarian within the last 12 months
- 2) Current Rabies vaccination (certificate required)
- 3) Heartworm/tick-borne disease 4DX test within the previous 12 months; recommended to be within the last 6 months
- 4) Distemper/Parvovirus vaccination (within 3 years) or titer (within 1 year). This vaccine should not be administered within 30 days of breeding.
- 5) Brucellosis test within 6 months

Please bring proof of vaccines and required tests to your first appointment. The brucellosis test can be performed at the Animal Hospital of Statesville if needed.

Rabies vaccination is legally required by the State of North Carolina and may be administered at the start of the bitch's heat cycle if necessary. Distemper/Parvovirus is a modified-live vaccine and should not be given during the heat cycle or pregnancy. Current vaccination or positive titers for distemper and parvovirus will allow the bitch to produce effective colostrum and provide passive immunity to her puppies. Please ensure this is up to date at least 30 days prior to breeding.

Heartworm infection is a serious, potentially deadly condition and can cause significant complications to pregnancy. Tick-borne diseases are an emerging concern as a possible cause of infertility in dogs. For these reasons, we require that your breeding animals be tested (and treated if indicated) prior to breeding.

Brucellosis is a disease that causes abortion and infertility in dogs and humans. It is spread through natural breeding, artificial insemination, and contact with urine, saliva, and other bodily fluids from an infected dog. It is recommended to test bitches prior to each breeding and stud dogs every 6 months or prior to each breeding.

Please complete the form and return to our office.
