

Puppy Wellness Series

Puppies and kittens get some immunity from their mother. However, how long that immunity lasts varies. Because of that, we've developed a series of examinations, vaccines and pet parent education, on a schedule designed to help prevent the most common diseases and issues of puppies and kittens. It is important to stay on this schedule and to finish the entire series of vaccines in order to ensure protection of your puppy or kitten. During your Puppy or Kitten Wellness visits, your veterinarian and technician will go over things you need to know about raising a healthy, happy new member of the family. We encourage you to write down any questions you have and bring them to your visit! We want your new furry family member to bring lots of joy and love to your life, and knowing what they need and when they need it takes a lot of the stress off of you, as a pet parent. Adoption of a pet should be forever. The more you know, the better and more successful your relationship with your new pet will be!

Puppy Wellness Series
