

## Kitten Wellness Series

Kittens get some disease immunity from their mother. However, how long that immunity lasts varies. Because of that, we've developed a series of examinations, vaccines and pet parent education, on a schedule designed to help prevent the most common diseases and issues of puppies and kittens. It is important to stay on this schedule and to finish the entire series of vaccines in order to ensure protection of your kitten. During your Kitten Wellness visits, your veterinarian and technician will go over things you need to know about raising a healthy, happy new member of the family. We encourage you to write down any questions you have and bring them to your visit! We want your new furry family member to bring lots of joy and love to your life, and knowing what they need and when they need it takes a lot of the stress off of you, as a pet parent. Adoption of a pet should be forever. The more you know, the better and more successful your relationship with your new pet will be!

Ages 6-8 weeks:

• Kitten pediatric	\$37.75
• FVRCP	\$20.70
• Intestinal parasite smear	\$14.98
• Deworming	\$ 8.30
• Hazardous waste disposal	\$ 5.40

• Rabies***	\$ 25.15
• Hazardous waste disposal	\$ 5.40
Heartworm, flea & tick prevention**	_____
TOTAL:	\$124.70

\*\*Heartworm, flea & tick prevention is dispensed according to the weight of the pet. It is, therefore, not included in the total of each visit. Animal Hospital of Statesville recommends that ALL pets stay on heartworm, flea & tick prevention year-round for the health and safety of your pet and your family.

\*\*\*A preferred (and safer), but more expensive rabies vaccine is called Purevax. It is an optional upgrade, at a cost of \$41.50 instead of the \$25.15 rabies vaccine.
